TO WHOM IT MAY CONCERN

Mosmart was awarded the contract to do dust suppression at Dundee Precious Metals Tsumeb since September 2010.

The roads and tailings dam area is roughly 150 000 square meters. They also do dust suppression on various of our conveyors. Since awarded the contract there was no safety incidents from their side at Dundee Precious Metals Tsumeb, and also no alcohol related cases for the past twelve months.

In my opinion they are performing an excellent job.
